

What Could Possibly Go Wrong?

• **Game/Visuals - dropped/stuck frames**

• **Audio-clicks/glitches in output**

- **HFT - lose \$10m per minute**

(Core C++ 2019: Nimrod Sapis - High Frequency Trading and Ultra Low Latency development techniques)

• **Life-support/monitoring - deaths**

ADC

What Could Possibly Go Wrong?

- **Game/Visuals** - dropped/stuck frames
- **Audio** - clicks/glitches in output

- **HFT** - lose \$10m per minute

(Core C++ 2019: Nimrod Sapir - High Frequency Trading and Ultra Low Latency development techniques)

- **Life-support/monitoring** - deaths
